themlco.com/Academy/mgp/

PROGRAM OVERVIEW

- Build 12 projects in 12 weeks
Acquire command over 4 major domains:
domains: ML, DL, CV, NLP
- Work on research-based datasets from different disciplines
- Acquire 7+ core skills like MLOps, Explainable AI, Cloud deployment, etc
- Assistance on each project, one-on-one doubt solving, and beginner-friendly support

themlco.com/Academy/mgp/

PROJECTS

Machine_Learning:

1. Crisis Analysis
(Classification)
2. Resource-Use Exploration
(Regression)
3. Unsupervised Learning

challenges:
large datasets,
handling outliers,
imbalance,
tuning,
data processing

Deep_Learning:

1. Health Sector Problem
(Classification)
2. Particle Physics Study
(Regression)
3. Classification problem in
Physics

challenges:
structuring neural
networks,
network fine-tuning,
choosing appropriate
parameters

PROJECTS

Computer_Vision:

1. X-ray behavior study (Classification)
2. Segmentation Problem
3. Object Detection Special Cases

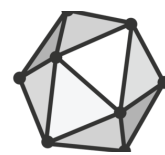

challenges:
data loading,
augmentation
techniques,
image processing,
transfer learning

Natural_Language_Processing:

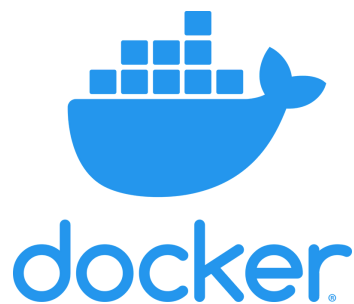

1. Text Classification
2. Text Translation
3. Text Generation

challenges:
text-preprocessing,
corpus handling,
sentiment analysis,
feature engineering

TOOLS & TECHNOLOGY

ONNX

Flask

themlco.com/Academy/mgp/

INFORMATION ON CONDUCT

1. 12-16 sessions in total
2. 1-3hrs of daily contribution for participants
3. Build end-to-end projects
4. Intermediate Python and basic ML skills are prerequisites
5. Acquire major in-demand skills like Explainable AI, Deployment, NLP, MLOps, and more.

ABOUT GUIDED PROJECTS

This is a 12-week long program organized with a complete project-based learning approach.

- 
1. ~~Original Charges: INR 5,999~~
 2. **TheHackWeekly discount:** INR 2,999
 3. **Offer valid till** 8th July 2022
 4. **Batch starts:** 9th July 2022
 5. **Website link:** themlco.com/Academy/mgp/
 6. **Perks:** Experience Letter, Networking opportunities, Strong portfolio
